Rechtsanwälte

PASCHEN

Rechtsanwälte

Since 1993, we have been dealing with commercial law matters as a law firm with offices throughout Germany. Today, PASCHEN Rechtsanwälte is one of Germany's leading law firms specialising in legal claims management.

We understand that legal claims management means the handling of the entire process, starting with the accrual of the debt, continuing to its collection and if necessary applying legal force.

Our involvement starts with advice during the preparation of contracts, including contract templates and General Terms of Business and leads on to assisting with the structuring of subsequent business workflows up to taking necessary measures to collect the debt considering judicial relief.

Business Service Management

We are able to interface with all common business software solutions to process online corporate data of all kinds. Through the continual optimisation of processes, we are also able to effectively and successfully handle mass-volume cases.

PASCHEN's strive for optimising client care, accompanied by consistent use of the latest IT technologies are fundamental to the constant development of our web-based interface. The transparency of proceedings and case status - updated daily, the ability to undertake the statistical assessment of cases as well as a number of innovative planning tools, provide all the tools required for effective risk management.

Practice Groups

The concentration of specialised knowledge and the constant exchange of inter-branch best practices ensures that you receive the highest levels of legal care. Experienced partners and responsible employees work with you to develop innovative solutions to your problems, aiming to achieve the best possible result – at the lowest cost and with the least bureaucracy.

International Claim Management

Due to our specialization in legal claim management we also attend to numerous cross-border cases.

The assertion of cross-border claims is subject to particular requirements. Essential to an effective assertion of claims abroad is profound knowledge of the applicable law as well as the respective procedural and enforcement law of the different jurisdictions.

Furthermore, to take advantage of the full potential of cross-border claim management substantial practical experience is needed. In particular the different rules regarding legal fees and costs, the estimated duration of proceedings in each jurisdiction as well as versatile options to enforcement measures must be taken into consideration.

International Allinace

Additionally, at PASCHEN we maintain excellent networking links to communicating lawyers abroad. We are continuously building on these intense but non-exclusive contacts. This enables us to offer a worldwide network of lawyers and hence always a suitable partner to pursue your claims. Naturally, we provide our knowledge and skills in German claim management to foreign companies as well.

Insurance

The subject of credit insurance is inseparably connected to claim management issues. Our Insurance practice group deals with questions related to the consultation of credit insurers and the assertion of their recourse claims.

Our experts in insurance law assist credit insurers and industrial insurance brokers developing innovative insurance products and individual service offers. In addition to the preparation of general insurance terms and the wording of insurance policies, we are also involved in the design of workflows with regard to the treatment of damage and recourse claims.

Beyond this, we are engaged in the assertion of insurers' recourse claims domestically and abroad. We offer particular outsourcing models for special market segments where the complete damage and recourse claim management is conducted by PASCHEN.

Our Insurance practice group specialist's competence does not merely derive from legal expertise but is also based from thorough understanding of the credit insurance trade, the current market situation as well as from the development of the credit insurance market.
